

January 11th, 2022

Dear BGC Hamilton-Halton Members and Families,

At the direction of the Chief Medical Officer of Health, a more sensitive COVID-19 symptom list is being reinstated for daily active screening of all children, staff and visitors attending BGC Hamilton-Halton's facilities or participating in in-person programs.

Currently, licensed child care is the only program running in-person, but we would like to update all of our members in anticipation of the eventual return to in-person programs.

Anyone who has symptoms suggestive of COVID-19 or is a confirmed positive case must self-isolate, regardless of vaccination status. These strengthened screening requirements are another way that we are helping to protect BGC Hamilton-Halton staff and children in our programs from COVID-19.

The updated screening can be accessed by visiting <https://covid-19.ontario.ca/school-screening/>.

As an additional layer of protection for children and staff, child care programs are required to continue daily on-site confirmation of screening for all children and staff until further notice.

We will continue to update our COVID-19 protocols as public health guidance evolves and are committed to keeping you informed of any changes.

If you have any questions please contact our Club by emailing frontdesk@bgchh.com or calling 905-549-2814 ext.221.

Sincerely,
BGC Hamilton-Halton
